

# PRECISION ENGINEERED EQUIPMENT Product Spotlight

## NEW – Fast, Accurate & Consistent Deck Height Measurements! (Part# DHC-1)

Quick and accurate deck height checks are a snap with BHJ's new Deck Height Caliper!

No need to set-up a new block in the surfer. Just grab the calipers and simply pick-up the main saddle and deck surface from either end of the block, or drop it into a cylinder bore.

The radius anvil at the far end centers quickly on any main saddle and the wide-face, flat deck anvil is easy to square-up on the deck surface.

Wide Deck Anvil

Tight Radius Anvil

High Quality & Reliable

The precision stainless steel anvils and very high-quality 12-inch caliper add up to a simple, accurate and lightning-fast way to verify deck height to within .0005", with the repeatability you expect from BHJ.

Early customer reviews call the DHC-1 "**Deadly Accurate**", "**Absolutely Spot-On**" and "**Great when I need to order pistons**".

The BHJ Deck Height Caliper weighs-in at a pound and a quarter and includes a certificate of calibration, instruction sheet and a foam-padded storage case.
