## Diesel Fire Ring Radius Cutters In Stock!

(Part# ORG-I120-FNR)

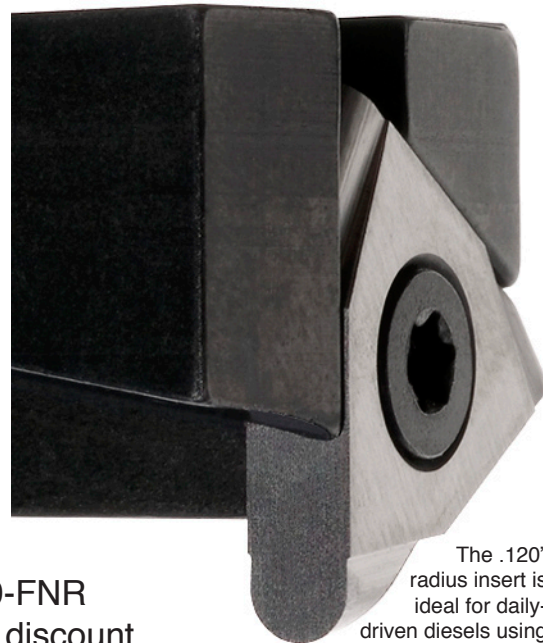

**Buy 5, Get 20% Off**

**All O-Ring Cutter Inserts**

(20% Off per 5x quantity)

### BHJ Announces the New .120" Full-Nose Radius Insert for our O-Ring Groove Cutter System!

This new insert is precision-ground on a .060" radius, has a maximum possible depth of cut of .100" and is properly profiled to make a clean, consistent circular groove, ideal for aftermarket Fire Rings in high performance diesels. Previously available only as a special-order item, the 120-FNR is now regularly stocked and ready for shipping, at a jobber discount price of \$52.00 each.

The .120" radius insert is ideal for daily-driven diesels using aftermarket fire rings. Shown installed in ORG tool holder.

BHJ's O-Ring Groove Cutter installed on a V8 cylinder head

The 120-FNR joins the flat-nose .120" insert, as well as the .039", .048", .060" and .085" in the BHJ lineup of regularly-stocked inserts. All inserts have three cutting tips for extended use and maximum profit per part.

The flat-nose .120" insert (Part# ORG-I120) has long been the choice of engine builders working with aftermarket Fire Ring kits for Cummins and other diesel applications. The latest findings from our customers show the flat nose insert is preferred for performance-only applications, while the radius insert is the new choice when Fire Rings are to be used in daily driven diesels.

Additional information on the BHJ O-Ring Groove Cutter is available in the Engine Block section of the website at [BHJProducts.com](http://BHJProducts.com)

**Call (510-797-6780), Fax (510-797-9364) or Email ([sales@bhjinc.com](mailto:sales@bhjinc.com))** for more information, or to place your order! And don't forget the 20% Off for each quantity of five inserts! (Mix-n-match insert part numbers is OK for discount!)

...And watch next month for our April Special!
